**Notes:-**

Frames 7 & 8 can be played by either a player not yet played (no change) or a player that has already played in frames 1 to 6. If a captain chooses to play a player(s) from the first six in either or both of frames 7 and 8 then the player(s) must be randomly drawn. Therefore:-

- Scenario 1.           A captain may choose to play 8 unique players for the singles and therefore there would be no change from last year.
- Scenario 2.           Should a captain play seven unique players in frames 1 to 7 and then ask for one player to be drawn for frame 8, then that player must be drawn from all 7 players who have played.
- Scenario 3.           Should a captain ask for two players to be drawn for frames 7 and 8 then they must be drawn from all 6 players who have played.

In the event that any players having played in frames 1 to 7 in scenario 2 or 1 to 6 in scenario 3 are unavailable for the draw, for whatever reason, they will not be allowed to return and play in the doubles.

If by coincidence two players who are randomly drawn end up playing each other for a second time, this is permitted as it is the luck of the draw.
